

# Truro Ponds Profile

A RESOURCE OF THE CAPE COD FRESHWATER INITIATIVE

Water quality is critical to the vitality of the region's pond ecosystems and coastal embayments. Yet pollutants found in stormwater runoff, and in groundwater by which ponds are recharged, threaten the region's freshwater quality. Understanding the broad issues that impact Cape Cod's freshwater ponds, characteristics of the region's ponds, and actions at the local level all help set a baseline for understanding and action.

## Truro

## Pond Monitoring

Of the town's 15 ponds, 0 have three consecutive years of recent monitoring data and only 53% of all the ponds have available monitoring data. The data record for this monitoring spans 10 years with an average of 0.4 sampling events at each monitored pond per year.

8 Ponds Monitored

0 Ponds with 3 Consecutive  
Years of Recent Data  
(2016-2021)

## Water Quality Impairments

A lack of consistent and available monitoring data for all ponds means that we may be underestimating threats to waterbody health.

## Top 5 Largest Ponds

POND	AREA
1. Slough Pond	31.0 acres
2. Horseleech Pond	25.0 acres
3. Ryder Pond	20.5 acres
4. Great Pond	17.6 acres
5. Great Swamp Pond	7.8 acres

## Top 5 Deepest Ponds

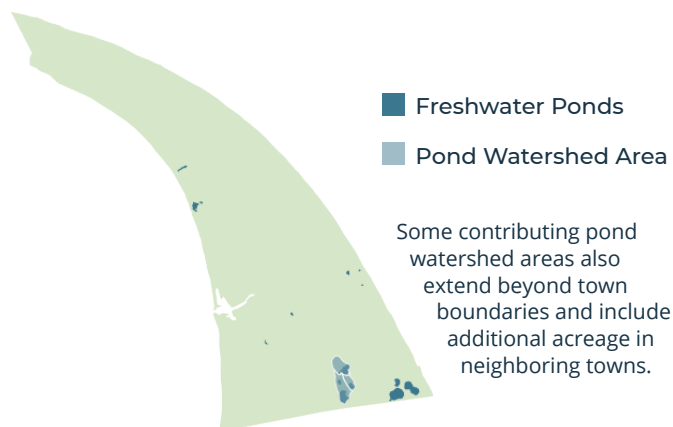

POND	DEPTH
1. Great Pond	35 ft.
2. Round Pond (East)	34 ft.
3. Ryder Pond	30 ft.
4. Round Pond (West)	30 ft.
5. Snow Pond	26 ft.

# Truro Ponds Profile

A RESOURCE OF THE CAPE COD FRESHWATER INITIATIVE

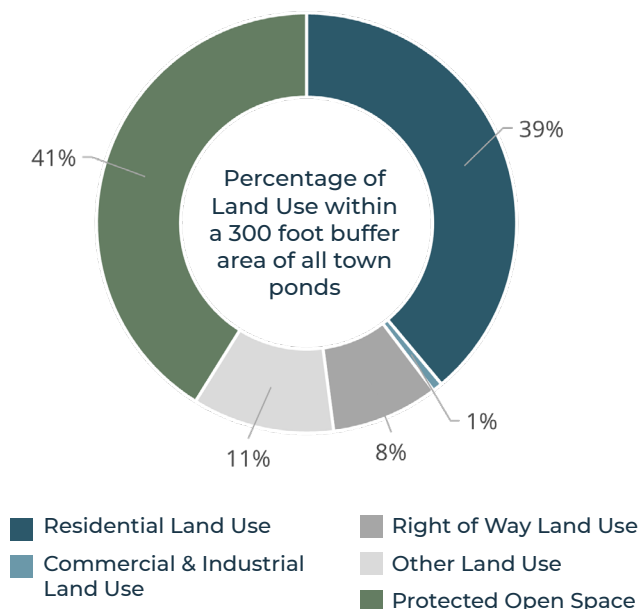

## Pond Watersheds

The land area that contributes to freshwater ponds and lakes is referred to as a pond watershed. Relatively few pond watersheds have been delineated across the Cape. Land area within pond watersheds is much larger than the water bodies themselves. In Truro, 1% of the town's total land area is within a delineated pond watershed.

## Land Use in Pond Buffer Area

Understanding the way that land is used around our freshwater ponds contributes to a better understanding of potential pond impacts, stressors, and viable strategies to protect or restore pond health. 310 acres (or 2%) of the town's total land area is within 300 feet of a freshwater pond.

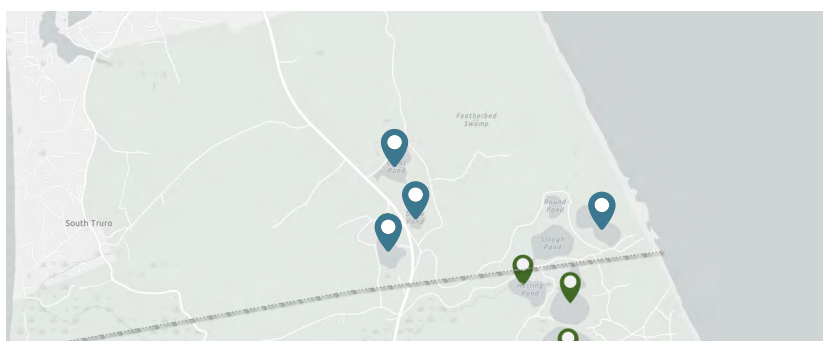

## Documented Town Reports and Actions

There are 0 town or pond specific freshwater reports in the regional dataset.

## Local Pond Organizations

Independent groups, organizing around a single or multiple ponds, voluntarily conduct educational and advocacy efforts and collect water quality monitoring data, which is not always available or sufficient for regional analysis.
