### +++++PRODUCTS WE USE+++++

#### Putty

Sarco Type M, available from

<http://winnmountainrestorations.com/>

<https://www.srshardware.com/>

Sarco putty is used by many folks in the window restoration trades. It is a linseed oil and calcium carbonate based product similar to that used a century ago.

#### Weather Stripping

Spring Bronze

<http://kilianhardware.com/sprinbronwea.html>

This product is a 'V' shaped spring bronze strip that is nailed to the jamb for windows using a rope and pulley balance system or to the sash itself for windows with hardware stops. It is used where parts slide against one another or at compression areas.

Silicone Bulb or Brush Pile

[http://conservationtechnology.com/building\\_weatherseals.html](http://conservationtechnology.com/building_weatherseals.html)

Heartwood uses the WS 32 or 33 at the meeting/check rail

Sash Cord and Chain

<http://kilianhardware.com/sashchain.html>

<http://kilianhardware.com/sashcord.html>

For average sized windows, the #8 (1/4") sash cord is more than sufficient.

For average sized windows, the #25 is the most common size. It is best to use a brass or stainless steel product than brass coated steel as the coated product may rust over time.

#### Glass Cutting Tools

<http://www.wgsonline.com/glass/210-15080.html>

<http://www.wgsonline.com/glass/210-23010.html>

<http://www.wgsonline.com/mm5/merchant.mvc?Screen=SRCH>

#### Safety Equipment

<https://www.uline.com/Product/Detail/S-15415E/Disposable-Clothing/Tyvek-Apron?model=S-15415E&RootChecked=yes>

<https://www.envirosafetyproducts.com/3m-half-facepiece-p100-respirator-assembly-6291-medium-with-3m-2091-particulate-filters-1-kit.html>

#### Storm Windows

<http://www.stormwindows.com/>

<https://www.harveybp.com/our-products/windows/tru-channel-storm-window/>

Harvey does not sell direct to homeowners, you will need a contractor to measure and order for you
