Re: Blue Sky Towers Monopole, Yarmouth (CCC File No. 21012)

Dear DRI Subcommittee Members,

At the December 14, 2021 Public Hearing for the above referenced project, there was discussion regarding the existing gap in data coverage and how the proposed tower location at 1044 Route 28 will help to address this gap. Presuming this is true, the natural next question is whether this is the right design for this location.

Other communities and cell tower developers/carriers have worked together to develop creative ways to camouflage cell towers and make them into an attraction, rather than a detraction. Other serious alternative designs that would fit better into our community have been ignored as they are not a standard design for Blue Sky Tower.

Alternative designs should be required that would take into consideration the aesthetic concerns of our community and the long term planning being undertaken for our Route 28 corridor.

Thank you for your consideration in this matter.

Sincerely,

Joanne Crowley, Chair
Yarmouth Planning Board
